International Journal of Mass Spectrometry

Subject Index

Absolute calibration
Absolute calibration of relative electron attachment cross sections measured by crossed-beams experiments, 77
Absolute cross sections
Absolute cross sections for dissociative electron attachment to NF_3, 111
Anionic states
Spectroscopy and dynamics of nitromethane (CH_3NO_2) and its anionic states, 171
Anion state symmetry
Dissociative electron attachment in highly polar molecules: Sodium halides, 137
Azobenzene
Specific formation of $(M\text{-}H)^-$ ions from OH-group-containing molecules, 119

Carbon dioxide
Electron capture by haloethanes in a carbon dioxide buffer gas, 85
Carbon tetrachloride
Dissociative electron attachment to CCl_4 molecules at low electron energies with meV resolution, 93
C_6H_6
Cross sections for electron trapping by condensed SF_6 and C_6H_6 under the influence of different polarizable environments, 301
Charge-remote fragmentation
Charge-remote fragmentation characteristics of monounsaturated fatty acids in resonance electron capture: differention between cis and trans isomers, 57
Charging
Cross sections for electron trapping by condensed SF_6 and C_6H_6 under the influence of different polarizable environments, 301
Chlorofluoromethane
Dissociative electron attachment in chlorofluoromethanes and the correlation with vertical attachment energies, 149
Cis/trans isomers
Charge-remote fragmentation characteristics of monounsaturated fatty acids in resonance electron capture: differention between cis and trans isomers, 57
Collision-induced dissociation
Charge-remote fragmentation characteristics of monounsaturated fatty acids in resonance electron capture: differention between cis and trans isomers, 57
Condensed films
Cross sections for electron trapping by condensed SF_6 and C_6H_6 under the influence of different polarizable environments, 301
Cross sections
Absolute calibration of relative electron attachment cross sections measured by crossed-beams experiments, 77
Dissociative electron attachment to N_2O clusters: Attachment spectra for $(N_2O)_nO^-$ anions (n = 0—7) from about 0 up to 25 eV, 65
Electron attachment cross sections and negative ion states of SF_6, 27
Temperature dependence of low-energy electron attachment to $CHCl_3$, 287

Density functional theory
Calculation of the anion and neutral thermochemistry of c-$C_5F_6Cl_2$ and c-$C_6F_8Cl_2$, 273
Desorption
Electron stimulated desorption from molecules on a noble gas solid: an analysis of cluster and island formation upon depoosition, 333
Desorption (ESD, PSD)
Role of morphology of D_2O ice (20—160 K) in low energy electron stimulated desorption of D^- and O^- anions, and x-ray photon stimulated desorption of D^+ cations, 327
1,2-Dichlorohexafluorocyclopentene
Calculation of the anion and neutral thermochemistry of c-$C_5F_6Cl_2$ and c-$C_6F_8Cl_2$, 273
1,2-Dichlorooctafluorocyclohexene
Calculation of the anion and neutral thermochemistry of c-$C_5F_6Cl_2$ and c-$C_6F_8Cl_2$, 273

Dissociative charge transfer
Dissociative charge transfer from highly excited Na Rydberg atoms to vibrationally excited Na_2 molecules, 233
Dissociative electron attachment

1387-3806/00/$20.00 © 2000 Elsevier Science B.V. All rights reserved

Absolute cross sections for dissociative electron attachment to NF_3, 111
Dissociative electron attachment in chlorofluoromethanes and the correlation with vertical attachment energies, 149
Dissociative electron attachment in highly polar molecules: Sodium halides, 137
Electron energy loss and dissociative electron attachment spectroscopy of methyl vinyl ether and related compounds, 43
Empty level structure and dissociative electron attachment in gas-phase nitro derivatives, 7
Spectroscopy and dynamics of nitromethane (CH_3NO_2) and its anionic states, 171

Electron affinity
Calculation of the anion and neutral thermochemistry of c-$C_5F_6Cl_2$ and c-$C_6F_8Cl_2$, 273
Studies of low-energy electron attachment at surfaces, 311
Electron attachment
Absolute calibration of relative electron attachment cross sections measured by crossed-beams experiments, 77
Calculation of the anion and neutral thermochemistry of c-$C_5F_6Cl_2$ and c-$C_6F_8Cl_2$, 273
Dissociative electron attachment to CCl_4 molecules at low electron energies with meV resolution, 93
Dissociative electron attachment to N_2O clusters: Attachment spectra for $(N_2O)_nO^-$ anions (n = 0—7) from about 0 up to 25 eV, 65
Electron attachment cross sections and negative ion states of SF_6, 27
Investigations of low energy electron attachment to ground state group 6B hexafluorides (SF_6, SeF_6, and TeF_6) using an electron-swarm mass spectrometric technique, 255
Product ion distributions and rate coefficients for the attachment reactions of electrons with $CHCl_2Br$, CCl_2Br_2, and $CHClBr_2$, 245
Studies of low-energy electron attachment at surfaces, 311
Temperature dependence of low-energy electron attachment to $CHCl_3$, 287
Electron capture reaction
Electron capture by haloethanes in a carbon dioxide buffer gas, 85
Electron energy loss spectrometry (EELS)
Electron energy loss and dissociative electron attachment spectroscopy of methyl vinyl ether and related compounds, 43
Electron energy loss spectroscopy (EELS)
Low energy electron impact on C_{76} and C_{84}: excitation, metastable anion formation, and lifetime, 17
Lowest energy triplet states of furan, studied by high resolution electron energy loss spectroscopy, 163
Spectroscopy and dynamics of nitromethane (CH_3NO_2) and its anionic states, 171
Electron impact
Total electron-ionization cross sections of the NO_2 molecule, 1
Electron-molecule interactions
Very low energy electron scattering in nitromethane, nitroethane, and nitrobenzene, 197
Electron molecule scattering
Low energy electron impact on C_{76} and C_{84}: excitation, metastable anion formation, and lifetime, 17
Electron monochromator
Dissociative electron attachment to N_2O clusters: Attachment spectra for $(N_2O)_nO^-$ anions (n = 0—7) from about 0 up to 25 eV, 65
The working principle of the trochoidal electron monochromator revisited, 209
Electron-stimulated desorption
Electron-stimulated desorption from the products of chemisorption of trifluorochloroethene on silicon, 295
Electron swarms
Investigations of low energy electron attachment to ground state group 6B hexafluorides (SF_6, SeF_6, and TeF_6) using an electron-swarm mass spectrometric technique, 255
Electron trajectory simulations
The working principle of the trochoidal electron monochromator revisited, 209
Electron transmission
Empty level structure and dissociative electron attachment in gas-phase nitro derivatives, 7
Empty level
Empty level structure and dissociative electron attachment in gas-phase nitro derivatives, 7
Energy resolution
The working principle of the trochoidal electron monochromator revisited, 209
Energy-transfer processes
Excimer formation in high-pressure microhollow cathode discharge plasmas in helium initiated by low-energy electron collisions, 279
Excimers
Excimer formation in high-pressure microhollow cathode discharge plasmas in helium initiated by low-energy electron collisions, 279

Fatty acids
Charge-remote fragmentation characteristics of monounsaturated fatty acids in resonance electron capture: differention between cis and trans isomers, 57

Flowing afterglow/Langmuir probe (FALP)
Product ion distributions and rate coefficients for the attachment reactions of electrons with $CHCl_2Br$, CCl_2Br_2, and $CHClBr_2$, 245
Fullerenes anions C_{76}, $^-$
Low energy electron impact on C_{76} and C_{84}: excitation, metastable anion formation, and lifetime, 17
Furan
Lowest energy triplet states of furan, studied by high resolution electron energy loss spectroscopy, 163

Halocarbons
Product ion distributions and rate coefficients for the attachment reactions of electrons with $CHCl_2Br$, CCl_2Br_2, and $CHClBr_2$, 245
Haloethanes
Electron capture by haloethanes in a carbon dioxide buffer gas, 85
High-pressure plasmas
Excimer formation in high-pressure microhollow cathode discharge plasmas in helium initiated by low-energy electron collisions, 279
Hollow cathode discharges
Excimer formation in high-pressure microhollow cathode discharge plasmas in helium initiated by low-energy electron collisions, 279

Ice
Role of morphology of D_2O ice (20—160 K) in low energy electron stimulated desorption of D^- and O^- anions, and x-ray photon stimulated desorption of D^+ cations, 327
Ion branching ratios
Product ion distributions and rate coefficients for the attachment reactions of electrons with $CHCl_2Br$, CCl_2Br_2, and $CHClBr_2$, 245
Ionization
Total electron-ionization cross sections of the NO_2 molecule, 1
Island formation
Electron stimulated desorption from molecules on a noble gas solid: an analysis of cluster and island formation upon depoosition, 333

Laser desorption ionization
Studies of low-energy electron attachment at surfaces, 311
Low-energy electron collisions
Excimer formation in high-pressure microhollow cathode discharge plasmas in helium initiated by low-energy electron collisions, 279
Lowest unoccupied molecular orbitals (LUMOs)
Dissociative electron attachment in chlorofluoromethanes and the correlation with vertical attachment energies, 149

Methyl vinyl ether
Electron energy loss and dissociative electron attachment spectroscopy of methyl vinyl ether and related compounds, 43
Morphology
Role of morphology of D_2O ice (20—160 K) in low energy electron stimulated desorption of D^- and O^- anions, and x-ray photon stimulated desorption of D^+ cations, 327
Multireference density
Electron energy loss and dissociative electron attachment spectroscopy of methyl vinyl ether and related compounds, 43

Negative ions
Calculation of the anion and neutral thermochemistry of c-$C_5F_6Cl_2$ and c-$C_6F_8Cl_2$, 273
Dissociative electron attachment to CCl_4 molecules at low electron energies with meV resolution, 93
Electron attachment cross sections and negative ion states of SF_6, 27
Electron stimulated desorption from molecules on a noble gas solid: an analysis of cluster and island formation upon depoosition, 333
Specific formation of $(M\text{-}H)^-$ ions from OH-group-containing molecules, 119
NF_3
Absolute cross sections for dissociative electron attachment to NF_3, 111
Nitro derivatives
Empty level structure and dissociative electron attachment in gas-phase nitro derivatives, 7
Nitrogen dioxide
Total electron-ionization cross sections of the NO_2 molecule, 1
N_2O clusters
Dissociative electron attachment to N_2O clusters: Attachment spectra for $(N_2O)_nO^-$ anions (n = 0—7) from about 0 up to 25 eV, 65

Ozone depletion
VUV optical absorption and energy loss spectroscopy of chlorine nitrate, 183

Phenol
Specific formation of $(M\text{-}H)^-$ ions from OH-group-containing molecules, 119
Polarization

Cross sections for electron trapping by condensed SF_6 and C_6H_6 under the influence of different polarizable environments, 301
Predissociation
Specific formation of $(M\text{-}H)^-$ ions from OH-group-containing molecules, 119

Rate coefficients
Product ion distributions and rate coefficients for the attachment reactions of electrons with $CHCl_2Br$, CCl_2Br_2, and $CHClBr_2$, 245
Rate constants
Absolute calibration of relative electron attachment cross sections measured by crossed-beams experiments, 77
Investigations of low energy electron attachment to ground state group 6B hexafluorides (SF_6, SeF_6, and TeF_6) using an electron-swarm mass spectrometric technique, 255
Temperature dependence of low-energy electron attachment to $CHCl_3$, 287
Resonance electron capture
Charge-remote fragmentation characteristics of monounsaturated fatty acids in resonance electron capture: differention between cis and trans isomers, 57
Resonance stabilization
Cross sections for electron trapping by condensed SF_6 and C_6H_6 under the influence of different polarizable environments, 301
Resonant electron capture mass spectrometry
Specific formation of $(M\text{-}H)^-$ ions from OH-group-containing molecules, 119
Rydberg atoms
Dissociative charge transfer from highly excited Na Rydberg atoms to vibrationally excited Na_2 molecules, 233
Rydberg electron-transfer spectroscopy
Rydberg electron-transfer spectroscopy and ab initio studies of dimethylsulfoxide–water neutral and anion dimers, 227

SF_6
Cross sections for electron trapping by condensed SF_6 and C_6H_6 under the influence of different polarizable environments, 301
Electron attachment cross sections and negative ion states of SF_6, 27
SF_6, SeF_6, TeF_6
Investigations of low energy electron attachment to ground state group 6B hexafluorides (SF_6, SeF_6, and TeF_6) using an electron-swarm mass spectrometric technique, 255
Sodium halides
Dissociative electron attachment in highly polar molecules: Sodium halides, 137
Sulfur hexafluoride
Electron attachment cross sections and negative ion states of SF_6, 27
Surface ionization
Studies of low-energy electron attachment at surfaces, 311

Temporary anion states
Dissociative electron attachment in chlorofluoromethanes and the correlation with vertical attachment energies, 149
Threshold law
Dissociative electron attachment to CCl_4 molecules at low electron energies with meV resolution, 93
TOF mass spectrometry
Studies of low-energy electron attachment at surfaces, 311
Trochoidal monochromator
The working principle of the trochoidal electron monochromator revisited, 209

Vertical attachment energies
Dissociative electron attachment in chlorofluoromethanes and the correlation with vertical attachment energies, 149
VUV
Spectroscopy and dynamics of nitromethane (CH_3NO_2) and its anionic states, 171
VUV optical absorption and energy loss spectroscopy of chlorine nitrate, 183
